This is in response to Papers filed on 12 and 17 November 2005.

I. Applicants' prior art submission filed on 12 November 2005 has been considered but is cumulative to that in Paper filed on 27 August 2004.

II. The following is an examiner's statement of reasons for allowance:

Patentees in the machine English language translations of Japanese Patent Nos. '067 and '068 filed on 27 August 2004 and 12 November 2005 disclose, teach and suggest that there may be used a benzenesulfonic acid or its salt containing compound in a high-concentration color photographic developer. However, there is no demonstration or reduction to practiced in any of the working examples that uses the benzenesulfonic acid or its salt containing compound to obtain or recognize its benefit. Therefore, no evidence of any benefit of the use of a benzenesulfonic acid or its salt containing compound to be contributed in the art in accordance with the authority stated in *In re Baird*, 29 USPQ2d 1550. In addition, applicants demonstrate and reduce to practice in Examples of the instant application with the use of sodium p-toluenesulfonate (salt of a benzenesulfonic acid)

Art Unit: 1752

that provides better result than the color photographic developing compositions containing (i) no sodium p-toluenesulfonate and (ii) sodium p-toluenesulfonate and triisopropanolamine (an alkanolamine containing compound). Furthermore, patentees in the machine English language translations of Japanese Patent Nos. '067 and '068 disclose, teach and suggest the use of both of (\*) benzenesulfonic acid or its salt containing compound and (\*\*) an alkanolamine in the same color photographic developing compositions. Accordingly, applicants are sufficiently shown that there are some advantages for the elected material (chemical composition) claims over the teachings and suggestions in Japanese Patent Nos. '067 and '068. The results as shown, demonstrated and reduced to practice would be contributed some advances and benefits to the photographic art.

Claims 13-20 are permitted to be rejoined with the allowable material claim 1 since they contained the allowable language "the concentration of the composition according to claim 1".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
